## PREFACE

In the 2001 edition *Plantation -, Merchant-, and Mining money of the Netherlands East Indies* , authors: A.J. Lansen and L.T. Wells jr. , some additional tokens from British North Borneo are added.

In recent years it has become increasingly clear that a reworking of the existing data and a new numbering was desirable. A large number of the, so-called , *LaWe* numbers therefore has been discontinued.

This book describes a total of twenty-two different plantations and companies, including six new ones. As far as possible, after extensive research, the interesting plantation and company history has also been described, to the extent that this could still be traced. Six new chapters have been added to the overview drawn up by Mr. Saran Singh. (second edition 1996)

A total of 117 tokens are now described in this book. Also thirteen wrongly attributed Estate tokens to British North Borneo are described .

Corrections, complementary information or other comments regarding these tokens and there use will be warmly welcomed by the author, who can be reached at the following address: A.J. Lansen, Haanderik 94, 3401 ET IJsselstein, The Netherlands and: @ [lansenkil@hotmail.nl](mailto:lansenkil@hotmail.nl) and [ajlansen@caiway.nl](mailto:ajlansen@caiway.nl)
